

MUBASHIR HASNAIN

Senior Flutter Developer | Mobile Architecture & Performance | AI-Assisted Engineering
Mobile Application Developer | Flutter · React Native · Swift · Kotlin · Java | iOS & Android
☎ +92 331 2025765 | ✉ mubashera38@gmail.com | Karachi, Pakistan

PROFESSIONAL SUMMARY

Talented and motivated Mobile Application Developer with 6+ years of experience designing, developing, testing, deploying, and maintaining high-quality mobile applications for Android and iOS platforms. Proficient in Flutter, Dart, React Native, Swift, Kotlin, and Java with strong knowledge of mobile application architecture, design patterns, RESTful APIs, and JSON-based services. Experienced with Firebase services (Authentication, Cloud Messaging, Analytics, Crashlytics), SQLite, MySQL, Git, CI/CD pipelines, and cloud platforms including AWS, Azure, and GCP. Proven track record of successfully published and maintained applications on the Google Play Store and Apple App Store with 150,000+ combined downloads across 15+ production applications. Skilled in Agile/Scrum methodologies, code reviews, technical documentation, user guides, and all phases of the SDLC from planning through maintenance. Based in Karachi, available to commute and work in person. Strong problem-solving and analytical skills with excellent communication, attention to detail, adaptability, and a commitment to delivering high-quality, user-friendly, high-performing mobile solutions.

PROFESSIONAL EXPERIENCE

Software Engineer | Mezan Group

Aug 2025 Present

- ▶ Designing, developing, testing, and deploying mobile applications for Android and iOS using Flutter, collaborating with business analysts, UI/UX designers, and backend developers across all phases of the SDLC to deliver high-quality mobile solutions.
- ▶ Writing clean, maintainable, and efficient code following industry best practices; implementing security measures and ensuring data protection compliance across all mobile applications.
- ▶ Integrating mobile applications with REST APIs, databases, and third-party services; preparing technical documentation, user guides, and release notes to support deployment and ongoing maintenance.
- ▶ Identifying, troubleshooting, and resolving application defects and performance issues; participating in code reviews to ensure adherence to coding standards, and working in Agile/Scrum sprints to deliver high-quality software iteratively.
- ▶ Key projects: BA Program (sales & supervisor monitoring portal with Node.js/Next.js + MySQL backend), Distributor Order Management App (route-based tracking with real-time data sync), Cow Management System (IoT chip monitoring, vaccination records), and QR-based Loyalty App all with end-to-end ownership from architecture to production deployment.
- ▶ Expanding skill set into Oracle APEX development building low-code web applications and internal business tools on top of Oracle Database to support enterprise workflows at Mezan Group.
- ▶ Set up and managed CI/CD pipelines for Flutter applications using GitLab CI and AWS, automating build, test, and deployment workflows for App Store and Google Play releases.

Software Engineer | Pearl Engineers Planners & Project Managers

Feb 2025 July 2025

- ▶ Led a cross-functional team of SEO specialists and web developers on mobile and web projects for service-based businesses.
- ▶ Developed modular Flutter components, reducing new-feature development time by 30%.
- ▶ Implemented state management with GetX and BLoC delivered cross-platform mobile applications for various client needs.
- ▶ Proficient in writing unit tests, conducting UI testing, and debugging to ensure optimal performance and stability.

- ▶ Key app delivered: PEPP a construction-focused mobile platform for the UK market (Pearl Engineers Planners & Project Managers), covering Home, Service Categories, Contact Us, Client Reviews, and Quotation. Published on the App Store.

Flutter Developer | 7CTECH

Dec 2020 Jan 2025

- ▶ Developed and maintained cross-platform Flutter applications and native Android projects using Kotlin, delivering high-quality apps with pixel-perfect UI, native platform integrations via Platform Channels, and consistent performance across Android and iOS.
- ▶ Optimized application performance, achieving a 25% increase in app speed and an 80% decrease in crash rates.
- ▶ Applied clean architecture, MVVM, and GoF design patterns with a strong ownership mindset proactively improving the product and team engineering processes, reducing new-feature development time by 30% through reusable modular component libraries.
- ▶ Applied test automation strategies using Flutter's testing framework and Appium for cross-platform UI validation, ensuring code quality and regression coverage across production applications.
- ▶ Delivered and maintained numerous high-quality cross-platform applications, achieving a portfolio with 130,000+ downloads including FashionPass alone surpassing 130,000+ downloads on the App Store.
- ▶ Key fintech-relevant apps: FashionPass (130,000+ App Store downloads Stripe payment integration, Face ID/Touch ID biometric auth, FCM notifications), internal Fees Collection App (payment workflows), and a QR-based Loyalty App demonstrating experience in regulated, payment-integrated mobile environments.

Flutter Developer (Internship) | SUPERTECH

Mar 2020 Jul 2020

- ▶ Built Flutter UIs from provided designs using widgets for layout, styling, and theming.
- ▶ Integrated RESTful APIs with http and Dio packages.
- ▶ Refactored critical app modules, improving memory usage and performance by 20%.

TECHNICAL SKILLS

Mobile	Flutter • Dart • React Native • Swift • Objective-C • Kotlin • Java • Platform Channels (Android/iOS)
State Mgmt	BLoC • GetX • Provider • Riverpod • setState
Architecture	MVC • MVVM • Clean Architecture • Repository Pattern • Design Patterns (GoF) • Algorithms & Data Structures
Animations	Implicit & Explicit Animations • Rive • Lottie • Custom Transitions
AI-Assisted Dev	Claude Code • GitHub Copilot • Cursor • AI-Assisted Code Generation, Refactoring, Testing & Documentation
Web / Full-Stack	HTML5 • CSS3 • JavaScript • JSON • XML • jQuery • AJAX • Node.js • Next.js
Backend & APIs	PHP (Laravel) • Node.js • REST APIs • GraphQL • JWT / OAuth • Firebase Auth • Firebase Cloud Functions
Database	SQLite • Realm • Core Data • Firebase Firestore • Microsoft SQL Server • MySQL • PostgreSQL • MongoDB
Cloud & BaaS	Firebase (Auth, Firestore, FCM, Storage, ML Kit) • Microsoft Azure • AWS • Google Cloud Platform (GCP) • Supabase
Third-Party SDKs	Google Maps • Mapbox • Agora (Video/Voice Calls) • Twilio (SMS / OTP) • OneSignal

Payments	Stripe • PayPal • In-App Purchases
Push & Messaging	Firebase FCM • OneSignal • Local Notifications
AI / ML	OpenAI API • Firebase ML Kit • Custom AI Model Integration • Chatbot Integration • Speech Recognition
DevOps	CI/CD Pipeline • Kubernetes • Linux • Git / GitHub / GitLab / Bitbucket • CodeMagic • Azure DevOps • App Center • GitLab CI • AWS • App Store • Google Play • TestFlight
Testing	Unit Testing • Widget Testing • Integration Testing • Appium • Playwright • SQA • Debugging • Crash Reporting
Tools	JIRA • Confluence • Figma • Sketch • Adobe XD • Android Studio • Xcode • Postman • Visual Studio Code

EDUCATION

BS Computer Science

Sir Syed University of Engineering & Technology, Karachi

KEY ACHIEVEMENTS

Impact & Scale

- ▶ FashionPass iOS app surpassed 130,000+ downloads, delivering Stripe payment processing, biometric authentication (Face ID/Touch ID), and real-time FCM notifications a high-scale, payment-integrated production application demonstrating fintech-grade mobile engineering.
- ▶ Delivered 15+ production-grade Flutter and full-stack applications across banking, fintech, e-commerce, logistics, and enterprise sectors, managing client relationships, translating business requirements and mockups into production-ready solutions, and leading development teams end-to-end.

Performance & Quality

- ▶ Reduced crash rates by 80% and improved app speed by 25% through systematic performance profiling and code optimization.
- ▶ Improved memory usage by 20% at SUPERTECH by refactoring critical app modules and applying Flutter best practices.
- ▶ Maintained near-zero downtime on live production apps by implementing robust CI/CD pipelines using GitLab CI and AWS, with automated testing and deployment workflows.

Architecture & Engineering

- ▶ Cut new-feature development time by 30% by designing and enforcing a reusable modular Flutter component library adopted across all team projects.
- ▶ Architected scalable Flutter applications applying clean architecture, MVVM, and GoF design patterns with strong focus on application performance, reliability, and user experience, consistently influencing technical decisions and contributing to architectural discussions across teams.
- ▶ Implemented scalable state management strategies (BLoC, GetX) across complex multi-screen apps, significantly reducing UI-layer bugs and improving testability.
- ▶ Integrated AI capabilities OpenAI API, Firebase ML Kit, and TFLite into production Flutter apps for chatbots, image recognition, and speech processing.

Leadership & Delivery

- ▶ Proactive code reviewer and knowledge sharer helped junior engineers grow through mentoring, pair programming, and establishing team coding standards; consistently took ownership of improving both product quality and the way the team works.

- ▶ Managed end-to-end app releases on both App Store (Apple Developer Console) and Google Play Store, including TestFlight beta distribution and production deployments.
- ▶ Successfully delivered PEPP a construction-focused mobile platform for the UK market from requirement gathering to App Store launch, meeting all client specifications.
- ▶ Led Ionic-to-Flutter migration projects at 7CTECH, delivering full feature parity, performance improvements, and consistent cross-platform UX across iOS and Android reducing legacy technical debt and accelerating release cycles.
